

Tomáš Sušánka

Tomáš Sušánka joined SatoshiLabs in 2017 as a Cryptography Engineer. His previous experience as a Cloudflare intern and small-stage speaker at DevCon gave him confidence in presenting low-level concepts to a broad audience. As SatoshiLabs has grown, Tomáš has progressed to Firmware Lead and is now Head Of Engineering. He enjoys working on open-source security innovations such as Trezor; dedicated to technical problem solving, Bitcoin is both his hobby and vocation.
